ARE YOU FACING THESE CHALLENGES ?

TOO MUCH THEORY
NO PROJECTS
SKILL GAP
NO GUIDANCE
?

- Still searching for your first job after graduation?
- Worried about the Gap? And don't know how to start your career?
- Stuck in a low-salary job? and seeking for better growth opportunities?
- Fear of switching to an IT career from a non-IT background
- Not getting interview calls despite applying to 100+ jobs?

How Inventateq Helps You

Waiting Ends. Careers Begin.
Build job-ready skills. Start applying with confidence.

Turns Gaps into Comebacks
Close skill gaps. Rebuild your career

Break Free. Move Forward
Learn in-demand skills. Take your next career step.

Doubt Out. Confidence In.
Practice real skills. Walk into interviews prepared.

Turn Rejections into Chances
Turn every setback into skills employers value.

Be Smart Learn AI
Learn AI tools. Work smarter. Stay updated

ABOUT INVENTATEQ

Inventateq is a leading IT training and placement company committed to transforming learners into industry ready professionals

Our Mission
To deliver high-quality education, practical skills and career opportunities that empower individuals to achieve their dreams.

Our Vision
To be a globally recognised training company known for innovation, quality and impactful learner outcomes.

Why Thousands Choose Inventateq?

15+	500+	25,000+	15,000+

WHY LEARN 3DS MAX ?

Enterprises worldwide are actively hiring certified 3ds Max professionals to drive critical business operations, digital transformation, and modernization.

CAREER SCOPE OF 3DS MAX

- **Exponential Industry Demand** – Rapid enterprise adoption across global IT firms, MNCs, and technology centers
- **Premium Salary Compensation** – Command competitive compensation packages with rapid growth milestones
- **Cross-Industry Opportunities** – Versatile skill set applicable across technology, consulting, finance, and core sectors
- **Future-Proof Career Growth** – Long-term job security supported by ongoing digital modernization and tooling investment
- **Global Certification Pathways** – Direct alignment with recognized industry certifications to validate your competence
- **Worldwide Job Prospects** – Open doors to roles in major Indian tech hubs as well as international remote positions

CAREER PROGRESSION

Job responsibilities, technical competency and portfolio evidence for each role.

ROLE PATHWAY	TYPICAL RESPONSIBILITIES	PORTFOLIO PROOF
3ds Max Associate	Manage core 3D Design tasks, configure tooling, and support delivery.	Practical 3D Design setup files, exercise scripts, and documentation.
3ds Max Specialist	Build practical Lighting workflows, implement features, and resolve issues.	Functional Lighting modules, workflow configs, and practical deliverables.
Senior 3ds Max Lead	Lead 3ds Max technical delivery, design solutions, and set standards.	Complete 3ds Max capstone artifacts, technical blueprints, and reports.

SKILLS ROADMAP

Progress from core foundations to production-ready enterprise workflows.

MILESTONE	PRACTICAL OUTPUT	REVIEW EVIDENCE
Milestone 1 (Foundations)	Master fundamental 3D Design concepts, environment setup, and tools.	Configured 3D Design workspace and verified practice exercises.
Milestone 2 (Implementation)	Develop practical Lighting workflows and functional domain modules.	Working Lighting project modules and validated practice outputs.
Milestone 3 (Advanced Workflows)	Implement advanced Animation Fundamentals features, integrations, and optimizations.	Validated Animation Fundamentals configurations and technical review outputs.
Milestone 4 (Production Capstone)	Deliver an end-to-end 3ds Max capstone project and technical review.	Complete 3ds Max capstone portfolio artifact and defense.

LEARN SKILLS • GET PLACED

DETAILED MODULE PLAN

10 in-depth modules • 3 Months Duration • Hands-on practical training

1 Module 1: 3D Design Fundamentals

- Core concepts of polygons, NURBS, meshes, transforms, and scene space
- Understanding interface layout, panels, viewports, and navigation tools
- Scene organization, naming discipline, and project folder structure
- Introduction to production pipelines in animation and visualization

GUIDED LAB
Log in to the system, practice basic navigation, and complete your first Core concepts of polygons exercise.

INTERVIEW & ASSESSMENT
Explain what Core concepts of polygons is used for and why companies choose it in simple words.

2 Module 3: Organic Modeling and Sculpt Readiness

- Creating character-friendly topology and edge flow ● Subdivision workflows and smoothing control ● Preparing models for sculpting, rigging, and animation
- Retopology basics and model optimization

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

3 Module 5: Lighting and Cameras

- Three-point lighting, studio setups, and cinematic lighting basics
- Using cameras, focal length, framing, and composition
- Shadow control, mood creation, and visual storytelling
- Scene setup for stills renders and animation shots

SIMULATION LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

4 Module 2: Object and Environment Modeling

- Polygon modeling workflows for props, hard-surface objects, and environments
- Modifiers, extrusions, bevels, and topology cleanup techniques
- Reference-based modeling and proportion control ● Low-poly and high-poly workflow awareness

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

5 Module 4: Materials, UVs, and Texturing

- UV unwrapping strategies and distortion reduction ● Applying materials, shaders, and texture maps ● Texture workflow for realism, stylization, and asset consistency
- Introduction to PBR thinking and map management

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

6 Module 6: Animation Fundamentals

- Timeline workflow, keyframes, graph editor, and animation curves
- Principles of motion, timing, spacing, and ease-in-ease-out
- Path animation and object animation exercises ● Shot planning and simple scene blocking

GUIDED LAB
Create a simple class model representing real-world items and test object creation.

INTERVIEW & ASSESSMENT
Explain what a class and an object are using a real-world example like a car.

7 Module 7: Rigging and Character Setup

- Joint systems, hierarchies, controllers, and constraints
- Skinning basics and deformation awareness ● Character rig preparation and control workflows ● Common rigging mistakes and cleanup practices

GUIDED LAB
Complete a guided practical exercise on Joint systems and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Joint systems and how you use it in real job roles.

8 Module 9: Rendering and Output

- Render settings, passes, output formats, and resolution planning
- Preview rendering versus final rendering workflows ● Batch rendering basics and asset quality checks ● Simple compositing awareness for presentation
- Certifications (2026 Updated)

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

9 Module 8: Dynamics, Effects, and

- Simulation Basics
- Particles, cloth, hair, and introductory simulation tools
- Collision concepts and scene interaction
- Using simulations for realism and motion support ● Managing caches and performance during previews

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

10 Module 10: Portfolio and Production Workflow

- Creating portfolio-quality stills, turntables, and short animation shots
- Asset presentation for film, game, and visualization roles
- Pipeline handoff awareness between modeling, texturing, and animation
- Building a clean demo reel or portfolio package
- Autodesk Certified User – Autodesk Maya
- Validated by: Autodesk, delivered through Certiport
- Fees: Exam voucher pricing varies by Certiport region and partner
- Exam duration: 50 minutes

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

REAL-WORLD PORTFOLIO PROJECTS

Practical industry scenarios, tools applied, and demonstrable project outcomes.

Project 1: Autodesk Certified User – Autodesk Maya

What it is: Set up the core 3D Design environment and configure essential business settings.
What you do: Initialize base configurations, create clean templates, and verify workflow controls.
Tools used: 3ds Max, 3D Design, polygons NURBS meshes
Project outcome: Working project foundation configured and tested according to best practices.

Project 2: Lighting Cameras Feature Implementation

What it is: Build practical Lighting Cameras modules to handle everyday business operations.
What you do: Create core functional components, validate input data, and prevent common errors.
Tools used: 3ds Max, Lighting Cameras, Three point lighting
Project outcome: Functional business module ready to run and demo with zero manual errors.

Project 3: Materials UVs Texturing Data & Logic Pipeline

What it is: Connect Materials UVs Texturing with UV unwrapping strategies to automate data and team workflows.
What you do: Set up automated pipelines, link required services, and run end-to-end tests.
Tools used: 3ds Max, Materials UVs Texturing, UV unwrapping strategies
Project outcome: Live automated workflow pipeline documented with clear usage guides.

Project 4: Rigging Character Setup Integration & Automation

What it is: Optimize Rigging Character Setup workflows for security, speed, and reliability.
What you do: Audit performance bottlenecks, apply security rules, and optimize execution speed.
Tools used: 3ds Max, Rigging Character Setup, Joint systems hierarchies
Project outcome: Production-grade technical deliverable ready to add to your personal portfolio.

Project 5: 3ds Max End-to-End Capstone

What it is: Build a complete, production-ready 3ds Max project bringing all skills together.
What you do: Design, code, test, and deploy a complete workflow from scratch to launch.
Tools used: 3ds Max, Dynamics Effects, Simulation
Project outcome: Verified capstone project ready to showcase on your resume and interview calls.

ASSESSMENT FRAMEWORK

Module tests, practical evaluations, capstone and completion criteria.

COMPONENT	ASSESSMENT FOCUS	PASS EVIDENCE
Module Knowledge Quizzes	Core 3D Design principles, industry terminology, and workflow concepts	Consistent passing score across syllabus unit evaluation tests
Lab Submissions & Practice Reviews	Hands-on Lighting implementation, configuration, and practical exercises	Working lab deliverables satisfying practical evaluation rubrics
Hands-On Mini Projects	Independent problem-solving using intermediate Animation Fundamentals scenarios	Functional project artifacts addressing realistic domain scenarios
Final Production Capstone	End-to-end 3ds Max implementation, quality review, and delivery	Complete capstone submission with technical walkthrough review
Technical Mock Viva	Technical reasoning, troubleshooting, approaches, and communication	Successfully defending project decisions in structured mock panels

RESUME, GITHUB & LINKEDIN

Evidence-based resume writing and professional project presentation.

- Professional 3ds Max portfolio of 3D assets, polished scene renders, and models.
- Visual project sheets, live demonstration walkthroughs, and verified functional outputs.
- Direct resume bullet points highlighting hands-on 3ds Max tools and technical outcomes.
- Detailed 3D Design diagrams, component specifications, and end-to-end workflows.
- Project documentation covering Lighting setup, configuration steps, and test notes.
- Structured practice for technical interview pitches, walkthroughs, and viva defense.
