DETAILED MODULE PLAN

7 in-depth modules • 3 Months Duration • Hands-on practical training

1 Module 1: Welcome to the World of Mobile Apps!

- What is a smartphone app and how do mobile apps work?
- Exploring your phone's built-in sensors: Touchscreen, Camera, Speaker, and Accelerometer
- Setting up the visual App Designer environment (MIT App Inventor / Thunkable)
- Testing apps live on an Android phone or tablet using companion QR code connection

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

2 Module 2: Designing Your First App Screen

- Exploring the Designer palette: Buttons, Labels, Images, and TextBoxes
- Customizing screen colors, fun font sizes, and layout alignments
- Arranging screen items neatly using Horizontal and Vertical Arrangements
- Adding sound media files and button tap sound effects

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

3 Module 3: Blocks Coding & Event-Driven Actions

- Understanding Events: "When Button Clicked, Do Something"
- Connecting buttons to actions: Changing background colors and playing animal sounds
- Text-to-Speech: Making your phone speak any word you type out loud
- Creating a fun Animal Soundboard app that roars, quacks, and barks on command

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

4 Module 4: Interactive Quizzes & Variables

- What is a Variable? Storing user names and quiz scores in computer memory
- Building an interactive trivia quiz with multiple choice buttons
- Using IF-THEN-ELSE logic: Checking if the student answered correctly
- Updating score counters and celebrating high scores with confetti animations

GUIDED LAB
Write a basic program to store user information, do simple math, and print the output.

INTERVIEW & ASSESSMENT
Explain the difference between text, numbers, and lists with simple everyday examples.

5 Module 5: Canvas Drawing & Touch Games

- Introducing the Canvas component: Turning your screen into a digital drawing board
- Drawing colored lines and circles wherever your finger drags across the screen
- Adding a "Clear Screen" button and color selection palette
- Creating a Ball Bounce game: Making a ball bounce off walls when flung with your finger

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

6 Module 6: Smartphone Sensors & Camera Fun

- Using the Camera component: Taking pictures and showing them on the app screen
- Accelerometer Sensor: Detecting when the phone is shaken to trigger surprise actions
- Speech Recognizer: Turning spoken words into written text on the phone screen
- Texting & Phone Call components: Sending quick preset messages

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

7 Module 7: App Packaging & Publishing

- Designing a custom app icon that appears on the phone home screen
- Building and exporting the app as an installable Android APK file
- Installing your finished app directly onto your family's Android smartphones
- Hands-on Practical Projects:
- Talking Animal Soundboard: Build an app featuring pictures of animals that plays authentic animal sounds and speaks their names aloud when tapped.
- Finger Painting Magic Board: Create a digital drawing app where users choose paint colors, draw doodles with their fingertips, and shake the phone to erase.
- Brainy Math Quiz Game: Design an interactive quiz app that generates random addition questions, keeps track of correct answers, and awards trophies.
- Magic 8-Ball Fortune Teller: Build an app that answers questions with random funny predictions whenever the smartphone is shaken.

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.
