WHY LEARN ETHICAL HACKING ?

Enterprises worldwide are actively hiring certified Ethical Hacking professionals to drive critical business operations, digital transformation, and modernization.

CAREER SCOPE OF ETHICAL HACKING

Exponential Industry Demand
Rapid enterprise adoption across global IT firms, MNCs, and technology centers

Premium Salary Compensation
Command competitive compensation packages with rapid growth milestones

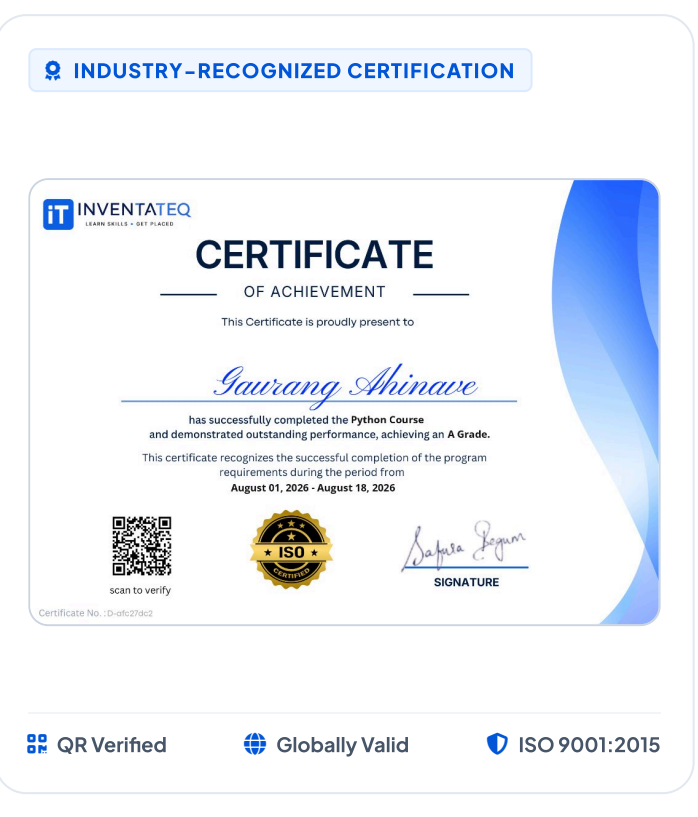
Cross-Industry Opportunities
Versatile skill set applicable across technology, consulting, finance, and core sectors

Future-Proof Career Growth
Long-term job security supported by ongoing digital modernization and tooling investment

Global Certification Pathways
Direct alignment with recognized industry certifications to validate your competence

Worldwide Job Prospects
Open doors to roles in major Indian tech hubs as well as international remote positions

INDUSTRY-RECOGNIZED CERTIFICATION



INVENTATEQ

SKILLS ROADMAP

Progress from core foundations to production-ready enterprise workflows.

MILESTONE	PRACTICAL OUTPUT	REVIEW EVIDENCE
Milestone 1 (Foundations)	Master fundamental Ethical Hacking concepts, environment setup, and tools.	Configured Ethical Hacking workspace and verified practice exercises.
Milestone 2 (Implementation)	Develop practical Data, Communication, workflows and functional domain modules.	Working Data, Communication, project modules and validated practice outputs.
Milestone 3 (Advanced Workflows)	Implement advanced Quality features, integrations, and optimizations.	Validated Quality configurations and technical review outputs.
Milestone 4 (Production Capstone)	Deliver an end-to-end Ethical Hacking capstone project and technical review.	Complete Ethical Hacking project portfolio artifact and defense.

DETAILED MODULE PLAN

9 in-depth modules • 3 Months Duration • Hands-on practical training

1 Module 1: Ethical Hacking

- Foundations
- Core concepts and business use cases in ethical hacking
- Platform or technology overview and workflow structure
- Key terminology and environment awareness
- Building practical conceptual clarity before implementation

GUIDED LAB
Perform a safe security inspection on Foundations in a controlled lab and report risks.

INTERVIEW & ASSESSMENT
Explain common security risks in Foundations and how to protect user data from attacks.

2 Module 2: Core Setup and

- Environment
- Tools, interfaces, and configuration basics ● Project or environment organization
- Working structure used in real projects ● Best practices for clean setup and navigation

GUIDED LAB
Perform a safe security inspection on Environment in a controlled lab and report risks.

INTERVIEW & ASSESSMENT
Explain common security risks in Environment and how to protect user data from attacks.

3 Module 5: Data, Communication, or Integration Awareness

- How data, integrations, or interactions are managed
- Working with connected systems or inputs
- Understanding dependencies and process flow
- Improving practical reliability in
- implementations

GUIDED LAB
Perform a safe security inspection on How data in a controlled lab and report risks.

INTERVIEW & ASSESSMENT
Explain common security risks in How data and how to protect user data from attacks.

4 Module 4: Intermediate Workflows

- Reusable components, logic, and structured workflow design
- How teams apply this in practical
- environments
- Maintaining clarity, consistency, and quality ● Connecting functional work to business needs

GUIDED LAB
Perform a safe security inspection on Reusable components in a controlled lab and report risks.

INTERVIEW & ASSESSMENT
Explain common security risks in Reusable components and how to protect user data from attacks.

5 Module 6: Quality and Optimization

- Validation, troubleshooting, optimization, and performance basics
- Reducing errors and improving maintainability ● Structured review and issue resolution habits
- Preparing work for more realistic project standards

GUIDED LAB
Perform a safe security inspection on Validation in a controlled lab and report risks.

INTERVIEW & ASSESSMENT
Explain common security risks in Validation and how to protect user data from attacks.

6 Module 7: Security, Governance, or Control

- Managing access, governance, or structured control where relevant
- Understanding safe and disciplined
- operational practices
- Supporting scalable work in enterprise-like environments
- Thinking beyond only task completion

GUIDED LAB
Perform a safe security inspection on Managing access in a controlled lab and report risks.

INTERVIEW & ASSESSMENT
Explain common security risks in Managing access and how to protect user data from attacks.

7 Module 8: Monitoring and

- Troubleshooting
- Operational visibility, diagnostics, and issue investigation
- How teams respond to failures or unexpected behavior
- Reading signals, logs, or outputs effectively
- Building confidence in structured
- troubleshooting

GUIDED LAB
Perform a safe security inspection on Troubleshooting in a controlled lab and report risks.

INTERVIEW & ASSESSMENT
Explain common security risks in Troubleshooting and how to protect user data from attacks.

8 Module 9: Industry Use Cases and Career Context

- How the technology is used across real business scenarios
- Interview-oriented understanding of practical workflows
- Positioning the skill within broader role expectations
- Connecting learning to jobs and project delivery

GUIDED LAB
Perform a safe security inspection on How the technology is used in a controlled lab and report risks.

INTERVIEW & ASSESSMENT
Explain common security risks in How the technology is used and how to protect user data from attacks.

9 Module 10: Real Project Workflow

- Building a practical end-to-end scenario or case
- Applying setup, execution, and review concepts together
- Preparing a demonstrable project for
- interviews or portfolio use
- Aligning outcomes with entry-level industry roles
- Career Opportunities
- Cybersecurity Analyst Trainee
- Vulnerability Assessment Associate

GUIDED LAB
Complete an end-to-end practical project bringing together everything you built in this course.

INTERVIEW & ASSESSMENT
Present your completed project and explain your key design decisions with confidence.

INVENTATEQ
LEARN SKILLS • GET PLACED

TWO PORTFOLIO PROJECTS

Practical industry scenarios, tools applied, and demonstrable project outcomes.

Project 1: Career Opportunities

What it is: Set up the core Ethical Hacking environment and configure essential business settings.

What you do: Initialize base configurations, create clean templates, and verify workflow controls.

Tools used: Ethical Hacking, business use cases

Project outcome: Working project foundation configured and tested according to best practices.

Project 2: Cybersecurity Analyst Trainee

What it is: Build practical Setup modules to handle everyday business operations.

What you do: Create core functional components, validate input data, and prevent common errors.

Tools used: Ethical Hacking, Setup, Environment

Project outcome: Functional business module ready to run and demo with zero manual errors.

Project 3: Vulnerability Assessment Associate

What it is: Connect Intermediate Workflows with Reusable components logic to automate data and team workflows.

What you do: Set up automated pipelines, link required services, and run end-to-end tests.

Tools used: Ethical Hacking, Intermediate Workflows, Reusable components logic

Project outcome: Live automated workflow pipeline documented with clear usage guides.

Project 4: Security Governance Contr System

What it is: Optimize Security Governance Control workflows for security, speed, and reliability.

What you do: Audit performance bottlenecks, apply security rules, and optimize execution speed.

Tools used: Ethical Hacking, Security Governance Control, Managing access governance

Project outcome: Production-grade technical deliverable ready to add to your personal portfolio.

Project 5: Ethical Hacking End-to-End Capstone

What it is: Build a complete, production-ready Ethical Hacking project bringing all skills together.

What you do: Design, code, test, and document a full project workflow from scratch to launch.

Tools used: Ethical Hacking, Industry Use Cases, technology is used

Project outcome: Verified capstone project ready to showcase on your resume and interview calls.

ASSESSMENT FRAMEWORK

Module tests, practical evaluations, capstone and completion criteria.

COMPONENT	ASSESSMENT FOCUS	PASS EVIDENCE
Module Knowledge Quizzes	Core Ethical Hacking principles, industry terminology, and workflow concepts	Consistent passing score across syllabus unit evaluation tests
Lab Submissions & Practice Reviews	Hands-on Data Communication implementation, configuration, and practical exercises	Working lab deliverables satisfying practical evaluation rubrics
Hands-On Mini Projects	Independent problem-solving using intermediate Quality techniques	Functional project artifacts addressing realistic domain scenarios
Final Production Capstone	End-to-end Ethical Hacking implementation, quality review, and delivery	Complete capstone submission with technical walkthrough review
Technical Mock Viva	Technical reasoning, troubleshooting approaches, and communication	Successfully defending project decisions in structured mock panels

RESUME, GITHUB & LINKEDIN

Evidence-based resume writing and professional project presentation.

- Security portfolio of vulnerability scan reports, packet traces, and playbooks.
- Detailed Ethical Hacking diagrams, component specifications, and end-to-end workflows.
- Visual project sheets, live demonstration walkthroughs, and verified functional outputs.
- Project documentation covering Data Communication setup, configuration steps, and test notes.
- Direct resume bullet points highlighting hands-on Ethical Hacking tools and technical outcomes.
- Structured practice for technical interview pitches, walkthroughs, and viva defense.
