ABOUT INVENTATEQ

Inventateq is a leading IT training and placement company committed to transforming learners into Industry ready professionals

Our Mission
To deliver high-quality education, practical slots and career opportunities that empower individuals to achieve their dreams

Our Vision
To be a globally recognised training company known for innovation, quality and impactful learner outcomes.

Why Thousands Choose Inventateq?

15+ Years of Excellence
500+ Hiring Partners
25,000+ Students Trained
15,000+ Students Placed

We Collaborate With

Deloitte. · Capgemini · amazon · HCL · Tech Mahindra

WHY LEARN FOGLIGHT ?

Enterprises worldwide are actively hiring certified Foglight professionals to drive critical business operations, digital transformation, and modernization.

CAREER SCOPE OF FOGLIGHT

- **Exponential Industry Demand**
  Rapid enterprise adoption across global IT firms, MNCs, and technology centers
- **Premium Salary Compensation**
  Command competitive compensation packages with rapid growth milestones
- **Cross-Industry Opportunities**
  Versatile skill set applicable across technology, consulting, finance, and core sectors
- **Future-Proof Career Growth**
  Long-term job security supported by ongoing digital modernization and tooling investment
- **Global Certification Pathways**
  Direct alignment with recognized industry certifications to validate your competence
- **Worldwide Job Prospects**
  Open doors to roles in major Indian tech hubs as well as international remote positions

INDUSTRY-RECOGNIZED CERTIFICATION

CAREER PROGRESSION

Job responsibilities, technical competency and portfolio evidence for each role.

ROLE PATHWAY	TYPICAL RESPONSIBILITIES	PORTFOLIO PROOF
Foglight Associate	Manage core Monitoring tasks, configure tooling, and support delivery.	Practical Monitoring setup files, exercise scripts, and documentation.
Foglight Specialist	Build practical Database Monitoring workflows, implement features, and resolve issues.	Functional Database Monitoring modules, workflow configs, and practical deliverables.
Senior Foglight Lead	Lead Foglight technical delivery, design solutions, and set standards.	Complete Foglight capstone artifacts, technical blueprints, and reports.

SKILLS ROADMAP

Progress from core foundations to production-ready enterprise workflows.

MILESTONE	PRACTICAL OUTPUT	REVIEW EVIDENCE
Milestone 1 (Foundations)	Master fundamental Monitoring concepts, environment setup, and tools.	Configured Monitoring workspace and verified practice exercises.
Milestone 2 (Implementation)	Develop practical Database Monitoring workflows and functional domain modules.	Working Database Monitoring project modules and validated practice outputs.
Milestone 3 (Advanced Workflows)	Implement advanced Database Performance features, integrations, and optimizations.	Validated Database Performance configurations and technical review outputs.
Milestone 4 (Production Capstone)	Deliver an end-to-end Foglight capstone project and technical review.	Complete Foglight project portfolio artifact and defense.

DETAILED MODULE PLAN

10 in-depth modules • 3 Months Duration • Hands-on practical training

1 Module 1: Monitoring and Database Observability Foundations

- Why monitoring matters for uptime, stability, and performance
- Role of Foglight in database and
- infrastructure observability
- How monitoring supports DBAs, platform teams, and operations staff
- Understanding visibility, diagnostics, and alerting in enterprise environments

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

2 Module 2: Foglight Platform Overview

- Architecture, agents, dashboards, and monitored environment concepts
- Connecting monitored assets and
- understanding basic setup flow
- How Foglight organizes hosts, databases, and monitored services
- Navigation of the product from an operator's perspective

GUIDED LAB
Complete a guided practical exercise on Architecture and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Architecture and how you use it in real job roles.

3 Module 3: Database Monitoring Basics

- Monitoring common database performance indicators and health metrics
- Sessions, waits, locks, utilization, and bottleneck awareness
- How DB-related issues surface in
- observability tools
- Daily health-check patterns for monitored database environments

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

4 Module 4: Alerts, Thresholds, and Rules

- Alert categories, severity, and threshold logic
- Reducing false positives and noisy
- operational alerting
- Using rules to surface actionable performance issues
- Escalation awareness and operational response thinking

GUIDED LAB
Complete a guided practical exercise on Alert categories and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Alert categories and how you use it in real job roles.

5 Module 5: Dashboards and Diagnostic Interpretation

- Working with dashboards, drill-downs, and time-based analysis
- Interpreting metric spikes, trends, and abnormal system behavior
- Turning technical measurements into meaningful analysis
- Using Foglight for proactive rather than purely reactive monitoring

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

6 Module 6: Database Performance Troubleshooting

- Finding root causes behind slow queries, waits, or resource contention
- Using monitoring data to support DBA investigation
- Correlating database symptoms with broader infrastructure conditions
- Troubleshooting discipline for operations and support teams

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

7 Module 7: Capacity and Optimization Awareness

- Trend analysis for planning and performance optimization
- Resource usage patterns and
- capacity-thinking basics
- Supporting long-term stability through data-driven monitoring reviews
- Recognizing early warning signs before incidents escalate

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

8 Module 8: Operational Reporting and Team Workflows

- Daily reports, trend reviews, and health-status communication
- How monitored findings are shared across ops and DBA teams
- Maintaining observability hygiene in
- long-running environments
- Documenting issues and follow-up actions clearly

GUIDED LAB
Complete a guided practical exercise on Daily reports and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Daily reports and how you use it in real job roles.

9 Module 9: Enterprise Use Cases and Support Context

- Monitoring production databases and business-critical systems
- Using Foglight in support, monitoring, platform, and DBA-adjacent roles
- Interview-focused understanding of
- monitoring responsibilities
- Linking database observability skills to real operations jobs

GUIDED LAB
Complete a guided practical exercise on Monitoring production databases and business-critical and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Monitoring production databases and business-critical and how you use it in real job roles.

10 Module 10: Real Project Workflow

- Connecting monitored resources and
- analyzing realistic performance issues
- Applying dashboards, rules, alerts, and drill-down analysis together
- Creating a monitoring review summary with observations and recommendations
- Project output aligned with support and database monitoring careers
- Certifications (2026 Updated)
- Foglight product training pathway
- Validated by: Quest Software

GUIDED LAB
Complete an end-to-end practical project bringing together everything you built in this course.

INTERVIEW & ASSESSMENT
Present your completed project and explain your key design decisions with confidence.

REAL-WORLD PORTFOLIO PROJECTS

Practical industry scenarios, tools applied, and demonstrable project outcomes.

Project 1: analyzing realistic performance issues

What it is: Set up the core Monitoring Database Observability environment and configure essential business settings.
What you do: Initialize base configurations, create clean templates, and verify workflow controls.
Tools used: Foglight, Monitoring Database Observability, monitoring matters uptime
Project outcome: Working project foundation configured and tested according to best practices.

Project 2: Foglight product training pathway

What it is: Build practical Database Monitoring modules to handle everyday business operations.
What you do: Create core functional components, validate input data, and prevent common errors.
Tools used: Foglight, Database Monitoring, Monitoring common database
Project outcome: Functional business module ready to run and demo with zero manual errors.

Project 3: Dashboards Diagnostic Int System

What it is: Connect Dashboards Diagnostic Interpretation with dashboards drill downs to automate data and team workfl
What you do: Set up automated pipelines, link required services, and run end-to-end tests.
Tools used: Foglight, Dashboards Diagnostic Interpretation, dashboards drill downs
Project outcome: Live automated workflow pipeline documented with clear usage guides.

Project 4: Capacity Optimization Integration & Automation

What it is: Optimize Capacity Optimization workflows for security, speed, and reliability.
What you do: Audit performance bottlenecks, apply security rules, and optimize execution speed.
Tools used: Foglight, Capacity Optimization, Trend analysis planning
Project outcome: Production-grade technical deliverable ready to add to your personal portfolio.

Project 5: Foglight End-to-End Capstone

What it is: Build a complete, production-ready Foglight project bringing all skills together.
What you do: Design, code, test, and document a full project workflow from scratch to launch.
Tools used: Foglight, Enterprise Use Cases, Monitoring production databases
Project outcome: Verified capstone project ready to showcase on your resume and interview calls.

ASSESSMENT FRAMEWORK

Module tests, practical evaluations, capstone and completion criteria.

COMPONENT	ASSESSMENT FOCUS	PASS EVIDENCE
Module Knowledge Quizzes	Core Monitoring principles, industry terminology, and workflow concepts	Consistent passing score across syllabus unit evaluation tests
Lab Submissions & Practice Reviews	Hands-on Database Monitoring implementation, configuration, and practical exercises	Working lab deliverables satisfying practical evaluation rubrics
Hands-On Mini Projects	Independent problem-solving using intermediate Database Performance techniques	Functional project artifacts addressing realistic domain scenarios
Final Production Capstone	End-to-end Foglight implementation, quality review, and delivery	Complete capstone submission with technical walkthrough review
Technical Mock Viva	Technical reasoning, troubleshooting approaches, and communication	Successfully defending project decisions in structured mock panels

RESUME, GITHUB & LINKEDIN

Evidence-based resume writing and professional project presentation.

- Modular GitHub repository per project with setup steps, dependencies, and clean commits.
- Detailed Monitoring diagrams, component specifications, and end-to-end workflows.
- Visual project sheets, live demonstration walkthroughs, and verified functional outputs.
- Project documentation covering Database Monitoring setup, configuration steps, and test notes.
- Direct resume bullet points highlighting hands-on Foglight tools and technical outcomes.
- Structured practice for technical interview pitches, walkthroughs, and viva defense.

OUR STUDENT

Meet the learners who turned their goals into successful careers through dedication, skill, and continuous growth.
