DETAILED MODULE PLAN

10 in-depth modules • 3 Months Duration • Hands-on practical training

1 Module 1: Web Foundations and Internet Basics

- How websites work, browsers, domains, hosting, and client-server basics
- Project folder structures, file naming, and deployment awareness
- Intro to developer tools and debugging in the browser
- Understanding the front-end and back-end split in web projects

GUIDED LAB
Log in to the system, practice basic navigation, and complete your first How websites work exercise.

INTERVIEW & ASSESSMENT
Explain what How websites work is used for and why companies choose it in simple words.

2 Module 2: HTML Structure and

- Semantic Markup
- Document structure, headings, text, links, media, lists, and tables
- Semantic tags for accessibility and
- maintainable code
- Forms, validation basics, and common site sections
- Building clean page structure that supports SEO and usability

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

3 Module 3: CSS Styling and Layouts

- Selectors, box model, spacing, colors, typography, and styling discipline
- Flexbox, Grid, positioning, and multi-section page layouts
- Responsive design with breakpoints and mobile-first thinking
- Reusable styling patterns for clean
- portfolio-ready pages

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

4 Module 4: JavaScript Fundamentals

- Variables, data types, operators, conditions, loops, and functions
- DOM selection, events, and user interaction handling
- Form validation and basic dynamic UI behaviors
- Writing maintainable scripts for real websites

GUIDED LAB
Write a basic program to store user information, do simple math, and print the output.

INTERVIEW & ASSESSMENT
Explain the difference between text, numbers, and lists with simple everyday examples.

5 Module 5: Interactive Front-End

- Development
- Navbar interactions, sliders, tabs, accordions, and modals
- Fetching data, JSON basics, and API-aware front-end thinking
- State awareness for small interfaces without heavy frameworks
- Improving user experience with practical interaction patterns

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

6 Module 6: Responsive and Accessible Web Design

- Accessibility basics including semantic structure and keyboard awareness
- Cross-device testing and browser
- compatibility checks
- Performance awareness for page speed and optimized media use
- Design consistency for production-style interfaces

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

7 Module 7: Version Control and

- Workflow
- Git basics, repositories, commits, branches, and collaboration awareness
- Managing assets, reusable components, and clean project history
- Deployment platforms and publishing static websites
- Client handoff practices for freelancer or agency work

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

8 Module 8: Framework or CMS

- Awareness
- Awareness of Bootstrap, React basics, or CMS usage depending on track
- When to use custom coding versus theme- or component-based development
- Reusable UI patterns and rapid project assembly methods
- How modern frontend tooling changes website workflows

GUIDED LAB
Create interactive web components that update information on the screen when clicked.

INTERVIEW & ASSESSMENT
Explain what a component is and how data flows between different parts of a website.

9 Module 9: SEO, Forms, and Real Business Website Needs

- Metadata, page structure, user journeys, and conversion-aware layouts
- Contact forms, landing pages, and
- trust-building sections
- Image optimization, page hierarchy, and maintainability
- Building pages that suit real businesses and institute portfolios

GUIDED LAB
Build a clean web page with headings, paragraphs, images, and a working contact form.

INTERVIEW & ASSESSMENT
Explain the basic building blocks of any website to a non-technical client.

10 Module 10: Real Project Workflow

- Designing and building multiple pages from wireframe to live website
- Applying HTML, CSS, JavaScript,
- responsiveness, and deployment together
- Creating a portfolio-ready website with professional structure
- Preparing projects for interviews, internships, or freelance proposals
- Certifications (2026 Updated)
- CIW Web Foundations Associate
- Validated by: Certification Partners (CIW)

GUIDED LAB
Complete an end-to-end practical project bringing together everything you built in this course.

INTERVIEW & ASSESSMENT
Present your completed project and explain your key design decisions with confidence.
