WHY LEARN GOOGLE CLOUD ?

Enterprises worldwide are actively hiring certified Google Cloud professionals to drive critical business operations, digital transformation, and modernization.

CAREER SCOPE OF GOOGLE CLOUD

Exponential Industry Demand
Rapid enterprise adoption across global IT firms, MNCs, and technology centers

Premium Salary Compensation
Command competitive compensation packages with rapid growth milestones

Cross-Industry Opportunities
Versatile skill set applicable across technology, consulting, finance, and core sectors

Future-Proof Career Growth
Long-term job security supported by ongoing digital modernization and tooling investment

Global Certification Pathways
Direct alignment with recognized industry certifications to validate your competence

Worldwide Job Prospects
Open doors to roles in major Indian tech hubs as well as international remote positions

INDUSTRY-RECOGNIZED CERTIFICATION

INVENTATEQ

DETAILED MODULE PLAN

9 in-depth modules • 3 Months Duration • Hands-on practical training

1 Module 1: Google Cloud Platform Foundations

- Core concepts and business use cases in google cloud platform
- Platform or technology overview and workflow structure
- Key terminology and environment awareness
- Building practical conceptual clarity before implementation

GUIDED LAB
Configure and verify Core concepts and business use in your practice cloud environment.

INTERVIEW & ASSESSMENT
Explain how Core concepts and business use improves system reliability and performance.

2 Module 2: Core Setup and

- Environment
- Tools, interfaces, and configuration basics ● Project or environment organization
- Working structure used in real projects ● Best practices for clean setup and navigation

GUIDED LAB
Configure and verify Environment in your practice cloud environment.

INTERVIEW & ASSESSMENT
Explain how Environment improves system reliability and performance.

3 Module 5: Data, Communication, or Integration Awareness

- How data, integrations, or interactions are managed
- Working with connected systems or inputs
- Understanding dependencies and process flow
- Improving practical reliability in
- implementations

GUIDED LAB
Configure and verify How data in your practice cloud environment.

INTERVIEW & ASSESSMENT
Explain how How data improves system reliability and performance.

4 Module 4: Intermediate Workflows

- Reusable components, logic, and structured workflow design
- How teams apply this in practical
- environments
- Maintaining clarity, consistency, and quality ● Connecting functional work to business needs

GUIDED LAB
Configure and verify Reusable components in your practice cloud environment.

INTERVIEW & ASSESSMENT
Explain how Reusable components improves system reliability and performance.

5 Module 6: Quality and Optimization

- Validation, troubleshooting, optimization, and performance basics
- Reducing errors and improving maintainability ● Structured review and issue resolution habits
- Preparing work for more realistic project standards

GUIDED LAB
Configure and verify Validation in your practice cloud environment.

INTERVIEW & ASSESSMENT
Explain how Validation improves system reliability and performance.

6 Module 7: Security, Governance, or Control

- Managing access, governance, or structured control where relevant
- Understanding safe and disciplined
- operational practices
- Supporting scalable work in enterprise-like environments
- Thinking beyond only task completion

GUIDED LAB
Configure and verify Managing access in your practice cloud environment.

INTERVIEW & ASSESSMENT
Explain how Managing access improves system reliability and performance.

7 Module 8: Monitoring and

- Troubleshooting
- Operational visibility, diagnostics, and issue investigation
- How teams respond to failures or unexpected behavior
- Reading signals, logs, or outputs effectively
- Building confidence in structured
- troubleshooting

GUIDED LAB
Set up simple performance alarms to receive email alerts when cloud server CPU spikes.

INTERVIEW & ASSESSMENT
Explain how system monitoring helps engineers fix issues before users notice.

8 Module 9: Industry Use Cases and Career Context

- How the technology is used across real business scenarios
- Interview-oriented understanding of practical workflows
- Positioning the skill within broader role expectations
- Connecting learning to jobs and project delivery

GUIDED LAB
Configure and verify How the technology is used in your practice cloud environment.

INTERVIEW & ASSESSMENT
Explain how How the technology is used improves system reliability and performance.

9 Module 10: Real Project Workflow

- Building a practical end-to-end scenario or case
- Applying setup, execution, and review concepts together
- Preparing a demonstrable project for
- interviews or portfolio use
- Aligning outcomes with entry-level industry roles
- Career Opportunities
- Cloud Support Engineer
- GCP Administrator Trainee

GUIDED LAB
Complete an end-to-end practical project bringing together everything you built in this course.

INTERVIEW & ASSESSMENT
Present your completed project and explain your key design decisions with confidence.

LEARN SKILLS • GET PLACED

TWO PORTFOLIO PROJECTS

Practical industry scenarios, tools applied, and demonstrable project outcomes.

Project 1: Career Opportunities

What it is: Set up the core Google Cloud Platform environment and configure essential business settings.
What you do: Initialize base configurations, create clean templates, and verify workflow controls.
Tools used: Google Cloud, Google Cloud Platform, business use cases
Project outcome: Working project foundation configured and tested according to best practices.

Project 2: Cloud Support Engineer

What it is: Build practical Setup modules to handle everyday business operations.
What you do: Create core functional components, validate input data, and prevent common errors.
Tools used: Google Cloud, Setup, Environment
Project outcome: Functional business module ready to run and demo with zero manual errors.

Project 3: GCP Administrator Trainee

What it is: Connect Intermediate Workflows with Reusable components logic to automate data and team workflows.
What you do: Set up automated pipelines, link required services, and run end-to-end tests.
Tools used: Google Cloud, Intermediate Workflows, Reusable components logic
Project outcome: Live automated workflow pipeline documented with clear usage guides.

Project 4: Security Governance Contr System

What it is: Optimize Security Governance Control workflows for security, speed, and reliability.
What you do: Audit performance bottlenecks, apply security rules, and optimize execution speed.
Tools used: Google Cloud, Security Governance Control, Managing access governance
Project outcome: Production-grade technical deliverable ready to add to your personal portfolio.

Project 5: Google Cloud End-to-End Capstone

What it is: Build a complete, production-ready Google Cloud project bringing all skills together.
What you do: Design, code, test, and document a full project workflow from scratch to launch.
Tools used: Google Cloud, Industry Use Cases, technology is used
Project outcome: Verified capstone project ready to showcase on your resume and interview calls.

ASSESSMENT FRAMEWORK

Module tests, practical evaluations, capstone and completion criteria.

COMPONENT	ASSESSMENT FOCUS	PASS EVIDENCE
Module Knowledge Quizzes	Core Google Cloud principles, industry terminology, and workflow concepts	Consistent passing score across syllabus unit evaluation tests
Lab Submissions & Practice Reviews	Hands-on Data Communication implementation, configuration, and practical exercises	Working lab deliverables satisfying practical evaluation rubrics
Hands-On Mini Projects	Independent problem-solving using intermediate Quality techniques	Functional project artifacts addressing realistic domain scenarios
Final Production Capstone	End-to-end Google Cloud implementation, quality review, and delivery	Complete capstone submission with technical walkthrough review
Technical Mock Viva	Technical reasoning, troubleshooting approaches, and communication	Successfully defending project decisions in structured mock panels

RESUME, GITHUB & LINKEDIN

Evidence-based resume writing and professional project presentation.

- Modular GitHub repository per project with setup steps, dependencies, and clean commits.
- Detailed Google Cloud diagrams, component specifications, and end-to-end workflows.
- Visual project sheets, live demonstration walkthroughs, and verified functional outputs.
- Project documentation covering Data Communication setup, configuration steps, and test notes.
- Direct resume bullet points highlighting hands-on Google Cloud tools and technical outcomes.
- Structured practice for technical interview pitches, walkthroughs, and viva defense.
