DETAILED MODULE PLAN

10 in-depth modules • 3 Months Duration • Hands-on practical training

1 Module 1: Nagios Foundations

- Core concepts and business use cases in
- nagios
- Platform or technology overview and workflow
- structure
- Key terminology and environment awareness
- Building practical conceptual clarity before
- implementation

GUIDED LAB
Complete a guided practical exercise on Core concepts and business use cases and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Core concepts and business use cases and how you use it in real job roles.

2 Module 2: Core Setup and

- Environment
- Tools, interfaces, and configuration basics
- Project or environment organization
- Working structure used in real projects
- Best practices for clean setup and navigation

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

3 Module 3: Core Functional Concepts

- Primary technical or process concepts
- Handling common tasks and core workflows
- Relating concepts to real project execution
- Avoiding common beginner mistakes

GUIDED LAB
Complete a guided practical exercise on Primary technical or process concepts and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Primary technical or process concepts and how you use it in real job roles.

4 Module 4: Intermediate Workflows

- Reusable components, logic, and structured
- workflow design
- How teams apply this in practical
- environments
- Maintaining clarity, consistency, and quality
- Connecting functional work to business needs

GUIDED LAB
Complete a guided practical exercise on Reusable components and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Reusable components and how you use it in real job roles.

5 Module 5: Data, Communication, or

- Integration Awareness
- How data, integrations, or interfaces are
- managed
- Working with connected systems or inputs
- Understanding dependencies and process
- flow
- Improving practical reliability in
- implementations

GUIDED LAB
Complete a guided practical exercise on Integration Awareness and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Integration Awareness and how you use it in real job roles.

6 Module 6: Quality and Optimization

- Validation, troubleshooting, optimization, and
- performance basics
- Reducing errors and improving maintainability
- Structured review and issue resolution habits
- Preparing work for more realistic project
- standards

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

7 Module 7: Security, Governance, or

- Control
- Managing access, governance, or structured
- control where relevant
- Understanding safe and disciplined
- operational practices
- Supporting scalable work in enterprise-like
- environments
- Thinking beyond only task completion

GUIDED LAB
Complete a guided practical exercise on Control and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Control and how you use it in real job roles.

8 Module 8: Monitoring and

- Troubleshooting
- Operational visibility, diagnostics, and issue
- investigation
- How teams respond to failures or unexpected
- behavior
- Reading signals, logs, or outputs effectively
- Building confidence in structured
- troubleshooting

GUIDED LAB
Complete a guided practical exercise on Troubleshooting and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Troubleshooting and how you use it in real job roles.

9 Module 9: Industry Use Cases and

- Career Context
- How the technology is used across real
- business scenarios
- Interview-oriented understanding of practical
- workflows
- Positioning the skill within broader role
- expectations
- Connecting learning to jobs and project

GUIDED LAB
Complete a guided practical exercise on Career Context and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Career Context and how you use it in real job roles.

10 Module 10: Real Project Workflow

- Building a practical end-to-end scenario or
- case
- Applying setup, execution, and review
- concepts together
- Preparing a demonstrable project for
- interviews or portfolio use
- Aligning outcomes with entry-level industry
- roles

GUIDED LAB
Complete an end-to-end practical project bringing together everything you built in this course.

INTERVIEW & ASSESSMENT
Present your completed project and explain your key design decisions with confidence.

REAL-WORLD PORTFOLIO PROJECTS

Practical industry scenarios, tools applied, and demonstrable project outcomes.

Project 1: Applying setup, execution, and review

What it is: Set up the core Nagios environment and configure essential business settings.
What you do: Initialize base configurations, create clean templates, and verify workflow controls.
Tools used: Nagios, business use cases
Project outcome: Working project foundation configured and tested according to best practices.

Project 2: concepts together

What it is: Build practical Functional modules to handle everyday business operations.
What you do: Create core functional components, validate input data, and prevent common errors.
Tools used: Nagios, Functional, Primary technical process
Project outcome: Functional business module ready to run and demo with zero manual errors.

Project 3: Aligning outcomes with entry-level industry

What it is: Connect Data Communication with Integration to automate data and team workflows.
What you do: Set up automated pipelines, link required services, and run end-to-end tests.
Tools used: Nagios, Data Communication, Integration
Project outcome: Live automated workflow pipeline documented with clear usage guides.

Project 4: Security Governance Integration & Automation

What it is: Optimize Security Governance workflows for security, speed, and reliability.
What you do: Audit performance bottlenecks, apply security rules, and optimize execution speed.
Tools used: Nagios, Security Governance, Control
Project outcome: Production-grade technical deliverable ready to add to your personal portfolio.

Project 5: Nagios End-to-End Capstone

What it is: Build a complete, production-ready Nagios project bringing all skills together.
What you do: Design, code, test, and document a full project workflow from scratch to launch.
Tools used: Nagios, Industry Use Cases, Career Context
Project outcome: Verified capstone project ready to showcase on your resume and interview calls.

ASSESSMENT FRAMEWORK

Module tests, practical evaluations, capstone and completion criteria.

COMPONENT	ASSESSMENT FOCUS	PASS EVIDENCE
Module Knowledge Quizzes	Core Nagios Foundations principles, industry terminology, and workflow concepts	Consistent passing score across syllabus unit evaluation tests
Lab Submissions & Practice Reviews	Hands-on Core Functional implementation, configuration, and practical exercises	Working lab deliverables satisfying practical evaluation rubrics
Hands-On Mini Projects	Independent problem-solving using intermediate Quality techniques	Functional project artifacts addressing realistic domain scenarios
Final Production Capstone	End-to-end Nagios implementation, quality review, and delivery	Complete capstone submission with technical walkthrough review
Technical Mock Viva	Technical reasoning, troubleshooting approaches, and communication	Successfully defending project decisions in structured mock panels
