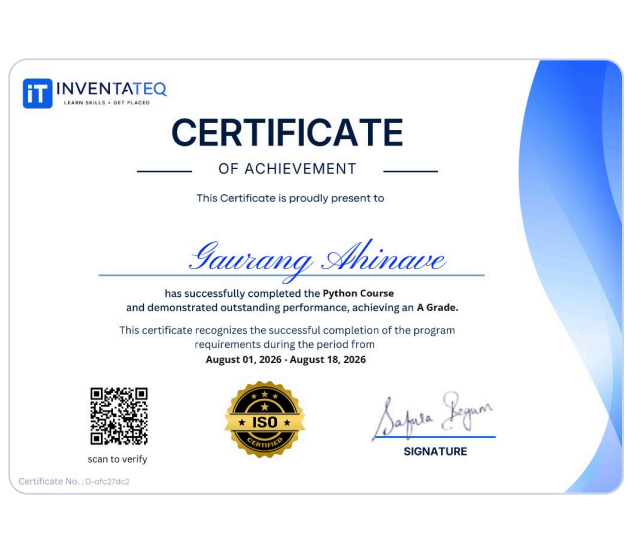
WHY LEARN ORACLE ?

Enterprises worldwide are actively hiring certified Oracle professionals to drive critical business operations, digital transformation, and modernization.

CAREER SCOPE OF ORACLE

- **Exponential Industry Demand**
  Rapid enterprise adoption across global IT firms, MNCs, and technology centers
- **Premium Salary Compensation**
  Command competitive compensation packages with rapid growth milestones
- **Cross-Industry Opportunities**
  Versatile skill set applicable across technology, consulting, finance, and core sectors
- **Future-Proof Career Growth**
  Long-term job security supported by ongoing digital modernization and tooling investment
- **Global Certification Pathways**
  Direct alignment with recognized industry certifications to validate your competence
- **Worldwide Job Prospects**
  Open doors to roles in major Indian tech hubs as well as international remote positions

INDUSTRY-RECOGNIZED CERTIFICATION



INVENTATEQ
CERTIFICATE
OF ACHIEVEMENT
This Certificate is proudly present to
has successfully completed the Python Course and demonstrated outstanding performance, achieving an A Grade.
This certificate recognizes the successful completion of the program requirements during the period from August 01, 2026 - August 18, 2026

CAREER PROGRESSION

Job responsibilities, technical competency and portfolio evidence for each role.

ROLE PATHWAY	TYPICAL RESPONSIBILITIES	PORTFOLIO PROOF
Oracle Associate	Manage core Database tasks, configure tooling, and support delivery.	Practical Database setup files, exercise scripts, and documentation.
Oracle Consultant	Build practical Advanced SQL workflows, implement features, and resolve issues.	Functional Advanced SQL modules, workflow config, and practical deliverables.
Lead Oracle Consultant	Lead Oracle technical delivery, design solutions, and set standards.	Complete Oracle capstone artifacts, technical blueprints, and reports.

SKILLS ROADMAP

Progress from core foundations to production-ready enterprise workflows.

MILESTONE	PRACTICAL OUTPUT	REVIEW EVIDENCE
Milestone 1 (Foundations)	Master fundamental Database concepts, environment setup, and tools.	Configured Database workspace and verified practice exercises.
Milestone 2 (Implementation)	Develop practical Advanced SQL workflows and functional domain modules.	Working Advanced SQL project modules and validated practice outputs.
Milestone 3 (Advanced Workflows)	Implement advanced SQL Optimization features, integrations, and optimizations.	Validated SQL Optimization configurations and technical review outputs.
Milestone 4 (Production Capstone)	Deliver an end-to-end Oracle capstone project and technical review.	Complete Oracle project portfolio artifact and defense.

DETAILED MODULE PLAN

10 in-depth modules • 3 Months Duration • Hands-on practical training

1 Module 1: Database and Oracle

- Foundations
- Role of Oracle databases in enterprise applications and transaction systems
- Understanding relational concepts, schemas, users, tablespaces, and database objects
- How database management differs from basic SQL writing
- Building the conceptual base for
- administration and performance work

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

2 Module 2: Oracle SQL Fundamentals

- Writing queries with filtering, sorting, joins, grouping, and subqueries
- Building clean SQL statements for reporting and application support needs
- Understanding how SQL logic affects result accuracy and efficiency
- Creating strong foundations before moving to performance tuning

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

3 Module 3: Advanced SQL and Query Design

- Using analytical functions, case logic, views, and set operations effectively
- Writing maintainable SQL for complex business questions
- Improving readability and correctness in larger query workflows
- Preparing for optimization-focused thinking through better query design

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

4 Module 4: Database Structure and Administration Basics

- Users, privileges, schemas, tablespaces, storage awareness, and administrative
- foundations
- Understanding instance and database concepts from an Oracle operations perspective
- Managing access and structure in a
- disciplined way
- Building DBA awareness beyond only query writing

GUIDED LAB
Complete a guided practical exercise on Users and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Users and how you use it in real job roles.

5 Module 5: Indexing and Execution Awareness

- Understanding indexes, access paths, and why performance differs across queries
- Reading execution-plan concepts and identifying inefficient SQL patterns
- How database structure and query design interact in real systems
- Building early optimizer-awareness for practical tuning

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

6 Module 6: SQL Optimization

- Techniques
- Improving filters, joins, indexing choices, and statement structure for performance
- Recognizing common causes of slow SQL and poor database efficiency
- Applying practical tuning logic instead of guesswork
- Supporting faster reporting and application response through better SQL

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

7 Module 7: Performance Monitoring and Troubleshooting

- Understanding waits, bottlenecks, resource usage, and operational performance awareness
- Using monitoring information conceptually to diagnose database issues
- Troubleshooting query slowdowns and basic database health problems
- Improving reliability through structured performance review

GUIDED LAB
Complete a guided practical exercise on waits and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of waits and how you use it in real job roles.

8 Module 9: Security, Governance, and Real DBA Workflow

- Managing user access, privilege control, and database-security awareness
- Supporting structured database operations in team or production environments
- Understanding the day-to-day responsibilities of database administrators
- Interview-oriented explanation of DBA and SQL-optimization roles
- Career Opportunities

GUIDED LAB
Complete a guided practical exercise on Managing user access and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Managing user access and how you use it in real job roles.

9 Module 8: Backup, Recovery, and Maintenance Awareness

- Importance of backups, restore awareness, and maintenance discipline in database
- operations
- Understanding the role of recovery planning and data protection
- Routine maintenance concepts that support stable enterprise environments
- Building responsible database-management habits

GUIDED LAB
Complete a guided practical exercise on Importance of backups and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Importance of backups and how you use it in real job roles.

10 Module 10: Real Project Workflow

- Building an Oracle-based workflow that includes SQL design, tuning awareness, and admin basics
- Applying queries, indexing concepts,
- execution analysis, and maintenance thinking together
- Preparing practical output for interviews, projects, or support-role readiness
- Project output aligned with Oracle DBA and SQL optimization careers
- Oracle DBA Trainee
- SQL Performance Analyst
- Database Administrator

GUIDED LAB
Complete an end-to-end practical project bringing together everything you built in this course.

INTERVIEW & ASSESSMENT
Present your completed project and explain your key design decisions with confidence.

REAL-WORLD PORTFOLIO PROJECTS

Practical industry scenarios, tools applied, and demonstrable project outcomes.

Project 1: Applying queries, indexing concepts,

What it is: Set up the core Database Oracle environment and configure essential business settings.
What you do: Initialize base configurations, create clean templates, and verify workflow controls.
Tools used: Oracle, Database, Oracle, Role Oracle databases
Project outcome: Working project foundation configured and tested according to best practices.

Project 2: Oracle DBA Trainee

What it is: Build practical Advanced SQL Query modules to handle everyday business operations.
What you do: Create core functional components, validate input data, and prevent common errors.
Tools used: Oracle, Advanced SQL Query, analytical functions case
Project outcome: Functional business module ready to run and demo with zero manual errors.

Project 3: SQL Performance Analyst

What it is: Connect Indexing Execution with indexes access paths to automate data and team workflows.
What you do: Set up automated pipelines, link required services, and run end-to-end tests.
Tools used: Oracle, Indexing Execution, indexes access paths
Project outcome: Live automated workflow pipeline documented with clear usage guides.

Project 4: Database Administrator

What it is: Optimize Performance Monitoring Troubleshooting workflows for security, speed, and reliability.
What you do: Audit performance bottlenecks, apply security rules, and optimize execution speed.
Tools used: Oracle, Performance Monitoring Troubleshooting, waits bottlenecks resource
Project outcome: Production-grade technical deliverable ready to add to your personal portfolio.

Project 5: Oracle End-to-End Capstone

What it is: Build a complete, production-ready Oracle project bringing all skills together.
What you do: Design, code, test, and document a full project workflow from scratch to launch.
Tools used: Oracle, Backup Recovery Maintenance, Importance backups restore
Project outcome: Verified capstone project ready to showcase on your resume and interview calls.

ASSESSMENT FRAMEWORK

Module tests, practical evaluations, capstone and completion criteria.

COMPONENT	ASSESSMENT FOCUS	PASS EVIDENCE
Module Knowledge Quizzes	Core Database principles, industry terminology, and workflow concepts	Consistent passing score across syllabus unit evaluation tests
Lab Submissions & Practice Reviews	Hands-on Advanced SQL implementation, configuration, and practical exercises	Working lab deliverables satisfying practical evaluation rubrics
Hands-On Mini Projects	Independent problem-solving using intermediate SQL Optimization techniques	Functional project artifacts addressing realistic domain scenarios
Final Production Capstone	End-to-end Oracle implementation, quality review, and delivery	Complete capstone submission with technical walkthrough review
Technical Mock Viva	Technical reasoning, troubleshooting approaches, and communication	Successfully defending project decisions in structured mock panels

INVENTATEQ

RESUME, GITHUB & LINKEDIN

Evidence-based resume writing and professional project presentation.

- Documented Oracle portfolio with blueprints, configuration sheets, and master data.
- Detailed Database diagrams, component specifications, and end-to-end workflows.
- Visual project sheets, live demonstration walkthroughs, and verified outputs.
- Project documentation covering Advanced SQL setup, configuration steps, and test notes.
- Direct resume bullet points highlighting hands-on Oracle tools and technical outcomes.
- Structured practice for technical interview pitches, walkthroughs, and viva defense.
