WHY LEARN RPA ?

Enterprises worldwide are actively hiring certified RPA professionals to drive critical business operations, digital transformation, and modernization.

CAREER SCOPE OF RPA

Exponential Industry Demand
Rapid enterprise adoption across global IT firms, MNCs, and technology centers

Premium Salary Compensation
Command competitive compensation packages with rapid growth milestones

Cross-Industry Opportunities
Versatile skill set applicable across technology, consulting, finance, and core sectors

Future-Proof Career Growth
Long-term job security supported by ongoing digital modernization and tooling investment

Global Certification Pathways
Direct alignment with recognized industry certifications to validate your competence

Worldwide Job Prospects
Open doors to roles in major Indian tech hubs as well as international remote positions

INDUSTRY-RECOGNIZED CERTIFICATION

SKILLS ROADMAP

Progress from core foundations to production-ready enterprise workflows.

MILESTONE	PRACTICAL OUTPUT	REVIEW EVIDENCE
Milestone 1 (Foundations)	Master fundamental Automation concepts, environment setup, and tools.	Configured Automation workspace and verified practice exercises.
Milestone 2 (Implementation)	Develop practical RPA Platform workflows and functional domain modules.	Working RPA Platform project modules and validated practice outputs.
Milestone 3 (Advanced Workflows)	Implement advanced Logic, Conditions, features, integrations, and optimizations.	Validated Logic, Conditions, configurations and technical review outputs.
Milestone 4 (Production Capstone)	Deliver an end-to-end RPA capstone project and technical review.	Complete RPA project portfolio artifact and defense.

DETAILED MODULE PLAN

10 in-depth modules • 3 Months Duration • Hands-on practical training

1 Module 1: Automation and RPA

- Foundations
- Understanding what RPA is and where it fits
- in modern business operations
- Difference between manual process
- execution, scripting, and robotic process
- automation
- Identifying tasks that are good candidates for
- automation

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

2 Module 2: Process Discovery and

- Workflow Mapping
- Studying business processes to identify
- repetitive rules-based automation opportunities
- Mapping steps, decisions, exceptions, and
- inputs before bot design
- Understanding why process clarity is essential
- for successful automation
- Connecting business workflows to automation

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

3 Module 3: RPA Platform and

- Bot-Building Basics
- Understanding a typical RPA development
- environment and workflow structure
- Building sequences, activities, variables, and
- control flow for bots
- Creating repeatable automation with clear
- logic and maintainability
- Learning how bots interact with desktop and

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

4 Module 4: Data Handling and File

- Automation
- Reading and writing files, spreadsheets,
- structured data, and form inputs inside
- automations
- Using data-driven logic to control automation
- behavior
- Improving business-process speed through
- reliable data handling

GUIDED LAB
Complete a guided practical exercise on Automation and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Automation and how you use it in real job roles.

5 Module 5: UI Automation and

- Application Interaction
- Interacting with screens, forms, buttons,
- fields, and navigation elements
- Handling selectors or UI references
- conceptually in automation workflows
- Building automations that work consistently
- across practical user interfaces
- Understanding reliability challenges in

GUIDED LAB
Build a clean web page with headings, paragraphs, images, and a working contact form.

INTERVIEW & ASSESSMENT
Explain the basic building blocks of any website to a non-technical client.

6 Module 6: Logic, Conditions, and

- Exception Handling
- Using loops, conditions, branching, and
- error-handling to build robust bots
- Planning for expected and unexpected
- exceptions in business processes
- Improving automation reliability through
- structured control logic
- Avoiding fragile bots by thinking beyond the

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

7 Module 7: Integration and Business

- Workflow Awareness
- Understanding how bots connect with email,
- files, web apps, ERP, or CRM systems
- Using RPA to support cross-application
- workflows and repetitive operations
- Recognizing where automation adds value
- and where manual control is still needed
- Linking bot design to actual business

GUIDED LAB
Complete a guided practical exercise on Workflow Awareness and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Workflow Awareness and how you use it in real job roles.

8 Module 8: Testing, Monitoring, and

- Deployment Awareness
- Testing automations for stability, exceptions,
- and operational readiness
- Understanding bot scheduling, monitoring,
- and production-support basics
- Maintaining and improving bots after
- deployment
- Building awareness of operational bot

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

9 Module 9: Automation Governance

- and Real Use Cases
- Compliance, documentation, and process
- control in automation programs
- Business use cases across finance, HR,
- operations, customer service, and reporting
- Interview-oriented understanding of RPA
- implementation and support scenarios
- Positioning RPA skills in business-automation

GUIDED LAB
Complete a guided practical exercise on and Real Use Cases and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of and Real Use Cases and how you use it in real job roles.

10 Module 10: Real Project Workflow

- Building an end-to-end bot for a repetitive
- business process
- Applying process mapping, UI automation,
- logic, file handling, and exception control
- together
- Preparing a demonstrable automation project
- for interviews or project showcase
- Project output aligned with RPA developer

GUIDED LAB
Complete an end-to-end practical project bringing together everything you built in this course.

INTERVIEW & ASSESSMENT
Present your completed project and explain your key design decisions with confidence.

REAL-WORLD PORTFOLIO PROJECTS

Practical industry scenarios, tools applied, and demonstrable project outcomes.

Project 1: Building an end-to-end bot for a repetitive

What it is: Set up the core Automation RPA environment and configure essential business settings.
What you do: Initialize base configurations, create clean templates, and verify workflow controls.
Tools used: RPA, Automation RPA, RPA is where
Project outcome: Working project foundation configured and tested according to best practices.

Project 2: business process

What it is: Build practical RPA Platform modules to handle everyday business operations.
What you do: Create core functional components, validate input data, and prevent common errors.
Tools used: RPA, RPA Platform, Bot Building
Project outcome: Functional business module ready to run and demo with zero manual errors.

Project 3: Applying process mapping, UI automation,

What it is: Connect UI Automation with Application Interaction to automate data and team workflows.
What you do: Set up automated pipelines, link required services, and run end-to-end tests.
Tools used: RPA, UI Automation, Application Interaction
Project outcome: Live automated workflow pipeline documented with clear usage guides.

Project 4: logic, file handling, and exception control

What it is: Optimize Integration Business workflows for security, speed, and reliability.
What you do: Audit performance bottlenecks, apply security rules, and optimize execution speed.
Tools used: RPA, Integration Business, Workflow
Project outcome: Production-grade technical deliverable ready to add to your personal portfolio.

Project 5: RPA End-to-End Capstone

What it is: Build a complete, production-ready RPA project bringing all skills together.
What you do: Design, code, test, and document a full project workflow from scratch to launch.
Tools used: RPA, Automation Governance, Real Use Cases
Project outcome: Verified capstone project ready to showcase on your resume and interview calls.

ASSESSMENT FRAMEWORK

Module tests, practical evaluations, capstone and completion criteria.

COMPONENT	ASSESSMENT FOCUS	PASS EVIDENCE
Module Knowledge Quizzes	Core Automation principles, industry terminology, and workflow concepts	Consistent passing score across syllabus unit evaluation tests
Lab Submissions & Practice Reviews	Hands-on RPA Platform implementation, configuration, and practical exercises	Working lab deliverables satisfying practical evaluation rubrics
Hands-On Mini Projects	Independent problem-solving using intermediate Logic Conditions techniques	Functional project artifacts addressing realistic domain scenarios
Final Production Capstone	End-to-end RPA implementation, quality review, and delivery	Complete capstone submission with technical walkthrough review
Technical Mock Viva	Technical reasoning, troubleshooting approaches, and communication	Successfully defending project decisions in structured mock panels

RESUME, GITHUB & LINKEDIN

Evidence-based resume writing and professional project presentation.

- Modular GitHub repository per project with setup steps, dependencies, and clean commits.
- Detailed Automation diagrams, component specifications, and end-to-end workflows.
- Visual project sheets, live demonstration walkthroughs, and verified functional outputs.
- Project documentation covering RPA Platform setup, configuration steps, and test notes.
- Direct resume bullet points highlighting hands-on RPA tools and technical outcomes.
- Structured practice for technical interview pitches, walkthroughs, and viva defense.
