ARE YOU FACING THESE CHALLENGES ?

- Still searching for your first job after graduation?
- Worried about the Gap? And don't know how to start your career?
- Stuck in a low-salary job? and seeking for better growth opportunities?
- Fear of switching to an IT career from a non-IT background
- Not getting interview calls despite applying to 100+ jobs?

TOO MUCH THEORY
NO PROJECTS
SKILL GAP
NO GUIDANCE

How Inventateq Helps You

Waiting Ends. Careers Begin.
Build job-ready skills. Start applying with confidence.

Turns Gaps into Comebacks
Close skill gaps. Rebuild your career

Break Free. Move Forward
Learn in-demand skills. Take your next career step.

Doubt Out. Confidence In.
Practice real skills. Walk into interviews prepared.

Turn Rejections into Chances
Turn every setback into skills employers value.

ABOUT INVENTATEQ

Inventateq is a leading IT training and placement company committed to transforming learners into Industry ready professionals

Our Mission
To deliver high-quality education, practical slots and career opportunities that empower individuals to achieve their dreams

Our Vision
To be a globally recognised training company known for innovation, quality and impactful learner outcomes.

Why Thousands Choose Inventateq?

15+ Years of Excellence
500+ Hiring Partners
25,000+ Students Trained
15,000+ Students Placed

We Collaborate With

Deloitte. · Capgemini · amazon · HCL · Tech Mahindra

WHY LEARN SOFTWARE TESTING ?

Enterprises worldwide are actively hiring certified Software Testing professionals to drive critical business operations, digital transformation, and modernization.

CAREER SCOPE OF SOFTWARE TESTING

Exponential Industry Demand
Rapid enterprise adoption across global IT firms, MNCs, and technology centers

Premium Salary Compensation
Command competitive compensation packages with rapid growth milestones

Cross-Industry Opportunities
Versatile skill set applicable across technology, consulting, finance, and core sectors

Future-Proof Career Growth
Long-term job security supported by ongoing digital modernization and tooling investment

Global Certification Pathways
Direct alignment with recognized industry certifications to validate your competence

Worldwide Job Prospects
Open doors to roles in major Indian tech hubs as well as international remote positions

INDUSTRY-RECOGNIZED CERTIFICATION

INVENTATEQ
CERTIFICATE
OF ACHIEVEMENT
Gaurang Ahinawe

SKILLS ROADMAP

Progress from core foundations to production-ready enterprise workflows.

MILESTONE	PRACTICAL OUTPUT	REVIEW EVIDENCE
Milestone 1 (Foundations)	Master fundamental Testing Fundamentals concepts, environment setup, and tools.	Configured Testing Fundamentals workspace and verified practice exercises.
Milestone 2 (Implementation)	Develop practical Functional workflows and functional domain modules.	Working Functional project modules and validated practice outputs.
Milestone 3 (Advanced Workflows)	Implement advanced Agile Testing features, integrations, and optimizations.	Validated Agile Testing configurations and technical review outputs.
Milestone 4 (Production Capstone)	Deliver an end-to-end Software Testing capstone project and technical review.	Complete Software Testing project portfolio artifact and defense.

DETAILED MODULE PLAN

10 in-depth modules • 3 Months Duration • Hands-on practical training

1 Module 1: Testing Fundamentals

- Role of testing in software quality and software delivery
- SDLC, STLC, verification, validation, and testing principles
- Static vs dynamic testing and common QA terminology
- Understanding testing across Waterfall, Agile, and DevOps contexts

GUIDED LAB
Log in to the system, practice basic navigation, and complete your first Role of testing in software exercise.

INTERVIEW & ASSESSMENT
Explain what Role of testing in software is used for and why companies choose it in simple words.

2 Module 2: Test Design and

- Documentation
- Requirement analysis, test scenarios, test cases, and traceability
- Positive, negative, boundary, and exploratory testing approaches
- Equivalence partitioning and boundary value analysis basics
- Writing clear defect reports and
- evidence-backed findings

GUIDED LAB
Write clear step-by-step test cases for a login page and log defects in a bug tracker.

INTERVIEW & ASSESSMENT
Explain what makes a great bug report and how to prioritize defects.

3 Module 3: Functional and System Testing

- Smoke, sanity, regression, retesting,
- integration, and system testing
- User flows, business rules, and validation logic checks
- Cross-browser and basic compatibility awareness
- Building confidence through structured test execution

GUIDED LAB
Execute targeted test scenarios for Smoke and document verification results.

INTERVIEW & ASSESSMENT
Explain how Smoke ensures software releases are stable and defect-free.

4 Module 5: Database and Backend Testing Basics

- SQL for testers, validating stored data, and backend verification
- CRUD validation and test data preparation
- Basic understanding of joins, filters, and integrity checks
- Using queries to support root-cause
- investigation

GUIDED LAB
Execute targeted test scenarios for SQL for testers and document verification results.

INTERVIEW & ASSESSMENT
Explain how SQL for testers ensures software releases are stable and defect-free.

5 Module 7: Test Management and Defect Tools

- Using Jira or similar tools for bug and task management
- Test cycles, dashboards, and execution reporting awareness
- Severity, priority, triage, and release risk thinking
- Maintaining clean QA communication and documentation habits

GUIDED LAB
Write clear step-by-step test cases for a login page and log defects in a bug tracker.

INTERVIEW & ASSESSMENT
Explain what makes a great bug report and how to prioritize defects.

6 Module 4: Agile Testing and Project Workflow

- Scrum concepts, sprint ceremonies, and QA participation in Agile teams
- User stories, acceptance criteria, and backlog understanding
- Test planning in iterative releases
- Working with developers, product teams, and business stakeholders

GUIDED LAB
Execute targeted test scenarios for Scrum concepts and document verification results.

INTERVIEW & ASSESSMENT
Explain how Scrum concepts ensures software releases are stable and defect-free.

7 Module 6: API Testing Foundations

- HTTP methods, status codes, headers, and request-response concepts
- REST API testing with tools such as Postman
- JSON validation and chaining requests for test coverage
- How API testing supports UI-independent quality checks

GUIDED LAB
Send test requests to a web API using Postman and check the response status codes.

INTERVIEW & ASSESSMENT
Explain how API testing finds server issues before they reach the user screen.

8 Module 8: Automation Testing

- Awareness
- Automation purpose, limits, and ROI thinking
- Intro to Selenium or similar UI automation stack
- Framework awareness, reusable scripts, and locator basics
- When to automate and when manual testing remains better

GUIDED LAB
Write clear step-by-step test cases for a login page and log defects in a bug tracker.

INTERVIEW & ASSESSMENT
Explain what makes a great bug report and how to prioritize defects.

9 Module 9: Non-Functional and

- Specialized Testing Awareness
- Performance, usability, security, and
- accessibility testing basics
- Mobile, API, and data-driven testing
- awareness
- Risk-based prioritization for limited time projects
- Quality considerations beyond just functional correctness

GUIDED LAB
Execute targeted test scenarios for Specialized Testing Awareness and document verification results.

INTERVIEW & ASSESSMENT
Explain how Specialized Testing Awareness ensures software releases are stable and defect-free.

10 Module 10: Real Project Workflow

- End-to-end project with requirement analysis, testing, defect logging, and retesting
- Manual and API validation on a realistic application flow
- Interview-oriented explanation of QA
- decisions and bug findings
- Portfolio-ready test documentation and reporting samples
- Certifications (2026 Updated)
- ISTQB Certified Tester Foundation Level (CTFL) v4.0
- Validated by: ISTQB

GUIDED LAB
Complete an end-to-end practical project bringing together everything you built in this course.

INTERVIEW & ASSESSMENT
Present your completed project and explain your key design decisions with confidence.

REAL-WORLD PORTFOLIO PROJECTS

Practical industry scenarios, tools applied, and demonstrable project outcomes.

Project 1: decisions and bug findings

What it is: Set up the core Testing environment and configure essential business settings.
What you do: Initialize base configurations, create clean templates, and verify workflow controls.
Tools used: Software Testing, Role testing software
Project outcome: Working project foundation configured and tested according to best practices.

Project 2: Functional System Testing Feature Implementation

What it is: Build practical Functional System Testing modules to handle everyday business operations.
What you do: Create core functional components, validate input data, and prevent common errors.
Tools used: Software Testing, Functional System Testing, Smoke sanity regression
Project outcome: Functional business module ready to run and demo with zero manual errors.

Project 3: Test Management Defect Data & Logic Pipeline

What it is: Connect Test Management Defect with Jira similar tools to automate data and team workflows.
What you do: Set up automated pipelines, link required services, and run end-to-end tests.
Tools used: Software Testing, Test Management Defect, Jira similar tools
Project outcome: Live automated workflow pipeline documented with clear usage guides.

Project 4: API Testing Integration & Automation

What it is: Optimize API Testing workflows for security, speed, and reliability.
What you do: Audit performance bottlenecks, apply security rules, and optimize execution speed.
Tools used: Software Testing, API Testing, HTTP methods status
Project outcome: Production-grade technical deliverable ready to add to your personal portfolio.

Project 5: Software Testing End-to-End Capstone

What it is: Build a complete, production-ready Software Testing project bringing all skills together.
What you do: Design, code, test, and document a full project workflow from scratch to launch.
Tools used: Software Testing, Non Functional, Specialized Testing
Project outcome: Verified capstone project ready to showcase on your resume and interview calls.

ASSESSMENT FRAMEWORK

Module tests, practical evaluations, capstone and completion criteria.

COMPONENT	ASSESSMENT FOCUS	PASS EVIDENCE
Module Knowledge Quizzes	Core Testing Fundamentals principles, industry terminology, and workflow concepts	Consistent passing score across syllabus unit evaluation tests
Lab Submissions & Practice Reviews	Hands-on Functional implementation, configuration, and practical exercises	Working lab deliverables satisfying practical evaluation rubrics
Hands-On Mini Projects	Independent problem-solving using intermediate Agile Testing techniques	Functional project artifacts addressing realistic domain scenarios
Final Production Capstone	End-to-end Software Testing implementation, quality review, and delivery	Complete capstone submission with technical walkthrough review
Technical Mock Viva	Technical reasoning, troubleshooting approaches, and communication	Successfully defending project decisions in structured mock panels

RESUME, GITHUB & LINKEDIN

Evidence-based resume writing and professional project presentation.

- Testing portfolio with test execution plans, automated suites, and bug logs.
- Detailed Testing Fundamentals diagrams, component specifications, and end-to-end workflows.
- Visual project sheets, live demonstration walkthroughs, and verified functional outputs.
- Project documentation covering Functional setup, configuration steps, and test notes.
- Direct resume bullet points highlighting hands-on Software Testing tools and technical outcomes.
- Structured practice for technical interview pitches, walkthroughs, and viva defense.
