STARTS HERE !

ARE YOU FACING THESE CHALLENGES ?

- Still searching for your first job after graduation?
- Worried about the Gap? And don't know how to start your career?
- Stuck in a low-salary job? and seeking for better growth opportunities?
- Fear of switching to an IT career from a non-IT background
- Not getting interview calls despite applying to 100+ jobs?

TOO MUCH THEORY
NO PROJECTS
SKILL GAP
NO GUIDANCE

How Inventateq Helps You

Waiting Ends. Careers Begin.
Build job-ready skills. Start applying with confidence.

Turns Gaps into Comebacks
Close skill gaps. Rebuild your career

Break Free. Move Forward
Learn in-demand skills. Take your next career step.

Doubt Out. Confidence In.
Practice real skills. Walk into interviews prepared.

Turn Rejections into Chances
Turn every setback into skills employers value.

Be Smart Learn AI
Learn AI tools. Work smarter. Stay updated

ABOUT INVENTATEQ

Inventateq is a leading IT training and placement company committed to transforming learners into Industry ready professionals

Our Mission
To deliver high-quality education, practical slots and career opportunities that empower individuals to achieve their dreams

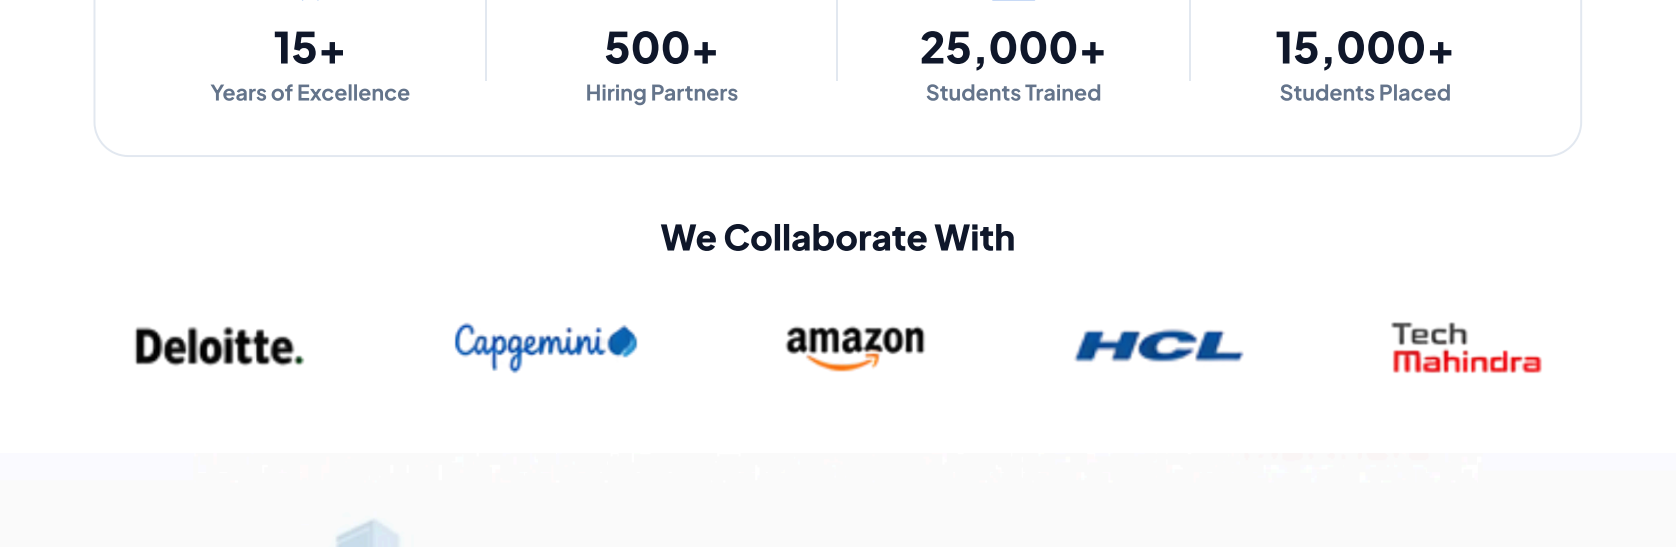
Our Vision
To be a globally recognised training company known for innovation, quality and impactful learner outcomes.

Why Thousands Choose Inventateq?

15+ Years of Excellence
500+ Hiring Partners
25,000+ Students Trained
15,000+ Students Placed

We Collaborate With

Deloitte. Capgemini amazon HCL Tech Mahindra



WHY LEARN TALEND ?

Enterprises worldwide are actively hiring certified Talend professionals to drive critical business operations, digital transformation, and modernization.

CAREER SCOPE OF TALEND

Exponential Industry Demand
Rapid enterprise adoption across global IT firms, MNCs, and technology centers

Premium Salary Compensation
Command competitive compensation packages with rapid growth milestones

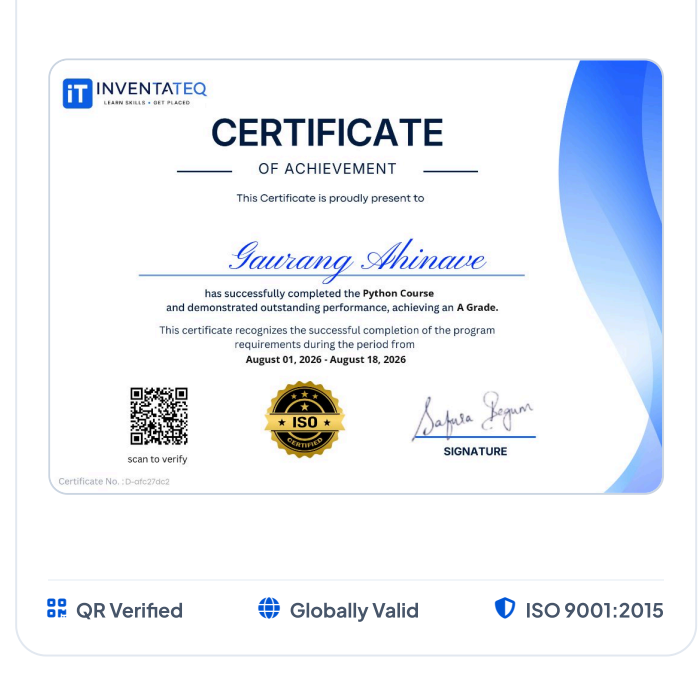
Cross-Industry Opportunities
Versatile skill set applicable across technology, consulting, finance, and core sectors

Future-Proof Career Growth
Long-term job security supported by ongoing digital modernization and tooling investment

Global Certification Pathways
Direct alignment with recognized industry certifications to validate your competence

Worldwide Job Prospects
Open doors to roles in major Indian tech hubs as well as international remote positions

INDUSTRY-RECOGNIZED CERTIFICATION



INVENTATEQ
CERTIFICATE
OF ACHIEVEMENT
This Certificate is proudly present to
Gaurang Ahinave
has successfully completed the Python Course and demonstrated outstanding performance, achieving an A Grade.
This certificate recognizes the successful completion of the program requirements during the period from
August 01, 2026 - August 18, 2026

CAREER PROGRESSION

Job responsibilities, technical competency and portfolio evidence for each role.

ROLE PATHWAY	TYPICAL RESPONSIBILITIES	PORTFOLIO PROOF
Talend Associate	Manage core Data Integration tasks, configure tooling, and support delivery.	Practical Data Integration setup files, exercise scripts, and documentation.
Talend Specialist	Build practical Metadata workflows, implement features, and resolve issues.	Functional Metadata modules, workflow configs, and practical deliverables.
Senior Talend Lead	Lead Talend technical delivery, design solutions, and set standards.	Complete Talend capstone artifacts, technical blueprints, and reports.

SKILLS ROADMAP

Progress from core foundations to production-ready enterprise workflows.

MILESTONE	PRACTICAL OUTPUT	REVIEW EVIDENCE
Milestone 1 (Foundations)	Master fundamental Data Integration concepts, environment setup, and tools.	Configured Data Integration workspace and verified practice exercises.
Milestone 2 (Implementation)	Develop practical Metadata workflows and functional domain modules.	Working Metadata project modules and validated practice outputs.
Milestone 3 (Advanced Workflows)	Implement advanced Database features, integrations, and optimizations.	Validated Database configurations and technical review outputs.
Milestone 4 (Production Capstone)	Deliver an end-to-end Talend capstone project and technical review.	Complete Talend project portfolio artifact and defense.

DETAILED MODULE PLAN

10 in-depth modules • 3 Months Duration • Hands-on practical training

1 Module 1: Data Integration

- Foundations
- Understanding ETL, ELT, data movement, and integration workflow basics
- Role of Talend in enterprise data engineering and reporting ecosystems
- How source systems, staging,
- transformations, and targets work together
- Building the right conceptual base before tool-level development

GUIDED LAB
Complete a guided practical exercise on Foundations and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Foundations and how you use it in real job roles.

2 Module 2: Talend Studio and Project Setup

- Talend Studio interface, repositories,
- metadata, and project organization
- Creating jobs, managing components, and understanding execution flow
- Setting up reusable project structures for maintainable ETL work
- Navigating Talend environments with
- discipline and clarity

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

3 Module 3: Metadata and Source

- Connectivity
- Defining metadata for files, databases, and source-system connections
- Working with structured inputs from CSV, Excel, relational databases, and other sources
- Why metadata quality improves ETL reliability and reusability
- Connecting Talend jobs to common enterprise data sources

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

4 Module 4: Job Design and Core

- Components
- Using input, output, row, and transformation components inside Talend jobs
- Designing data flows with mapping, filtering, lookup, and routing logic
- Understanding job orchestration from source read to target load
- Building ETL pipelines that are readable and maintainable

GUIDED LAB
Complete a guided practical exercise on Components and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Components and how you use it in real job roles.

5 Module 5: Transformations and Data Handling

- Applying field mapping, joins, lookups, expressions, and data conversions
- Handling business rules and data cleanup during ETL execution
- Using Talend to standardize and enrich data before loading
- Improving downstream reporting and
- analytics through better transformations

GUIDED LAB
Complete a guided practical exercise on Applying field mapping and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Applying field mapping and how you use it in real job roles.

6 Module 6: Database and File

- Integration
- Moving data between files, relational
- databases, and target structures
- Performing inserts, updates, merges, and batch-style data operations
- Handling common integration patterns across operational and reporting systems
- Understanding practical enterprise data-flow scenarios

GUIDED LAB
Complete a guided practical exercise on Integration and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Integration and how you use it in real job roles.

7 Module 7: Error Handling and Job Control

- Managing rejects, logs, exceptions, and failure-aware ETL design
- Controlling job execution order and improving run reliability
- Troubleshooting failed data loads and process issues systematically
- Building data jobs that are safer for
- production-like use

GUIDED LAB
Build a simple decision script that checks user input and repeats actions automatically.

INTERVIEW & ASSESSMENT
Explain when to use loops versus if-else conditions in simple words.

8 Module 8: Scheduling, Deployment, and Reusability Awareness

- Reusable routines, contexts, and
- parameter-driven job design
- Basic awareness of deployment, scheduling, and operational ETL support
- Creating jobs that are portable across environments
- Supporting recurring pipelines in business data workflows

GUIDED LAB
Complete a guided practical exercise on Reusable routines and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of Reusable routines and how you use it in real job roles.

9 Module 9: Data Quality and Practical ETL Workflow

- Understanding validation, deduplication, and data-quality awareness inside ETL
- How Talend supports trustworthy reporting and analytics foundations
- Interview-oriented explanations of ETL jobs and integration scenarios
- Linking Talend work to data engineering and BI support roles
- Career Opportunities

GUIDED LAB
Complete a guided practical exercise on validation and verify your results.

INTERVIEW & ASSESSMENT
Explain the core purpose of validation and how you use it in real job roles.

10 Module 10: Real Project Workflow

- Building a complete ETL pipeline from source ingestion to clean target output
- Applying metadata, transformations, database loading, and error handling together
- Preparing demonstrable ETL jobs for portfolio or interview use
- Project output aligned with ETL, Talend, and data-integration roles
- Talend Developer
- ETL Developer
- Data Integration Associate
- BI and ETL Support Engineer

GUIDED LAB
Complete an end-to-end practical project bringing together everything you built in this course.

INTERVIEW & ASSESSMENT
Present your completed project and explain your key design decisions with confidence.

REAL-WORLD PORTFOLIO PROJECTS

Practical industry scenarios, tools applied, and demonstrable project outcomes.

Project 1: Talend Developer

What it is: Set up the core Data Integration environment and configure essential business settings.
What you do: Initialize base configurations, create clean templates, and verify workflow controls.
Tools used: Talend, Data Integration, ETL ELT data
Project outcome: Working project foundation configured and tested according to best practices.

Project 2: ETL Developer

What it is: Build practical Metadata Source modules to handle everyday business operations.
What you do: Create core functional components, validate input data, and prevent common errors.
Tools used: Talend, Metadata Source, Connectivity
Project outcome: Functional business module ready to run and demo with zero manual errors.

Project 3: Data Integration Associate

What it is: Connect Transformations Data Handling with Applying field mapping to automate data and team workflows.
What you do: Set up automated pipelines, link required services, and run end-to-end tests.
Tools used: Talend, Transformations Data Handling, Applying field mapping
Project outcome: Live automated workflow pipeline documented with clear usage guides.

Project 4: BI and ETL Support Engineer

What it is: Optimize Error Handling Job workflows for security, speed, and reliability.
What you do: Audit performance bottlenecks, apply security rules, and optimize execution speed.
Tools used: Talend, Error Handling Job, Managing rejects logs
Project outcome: Production-grade technical deliverable ready to add to your personal portfolio.

Project 5: Talend End-to-End Capstone

What it is: Build a complete, production-ready Talend project bringing all skills together.
What you do: Design, code, test, and document a full project workflow from scratch to launch.
Tools used: Talend, Data Quality Practical, validation deduplication data
Project outcome: Verified capstone project ready to showcase on your resume and interview calls.

ASSESSMENT FRAMEWORK

Module tests, practical evaluations, capstone and completion criteria.

COMPONENT	ASSESSMENT FOCUS	PASS EVIDENCE
Module Knowledge Quizzes	Core Data Integration principles, industry terminology, and workflow concepts	Consistent passing score across syllabus unit evaluation tests
Lab Submissions & Practice Reviews	Hands-on Metadata implementation, configuration, and practical exercises	Working lab deliverables satisfying practical evaluation rubrics
Hands-On Mini Projects	Independent problem-solving using intermediate Database techniques	Functional project artifacts addressing realistic domain scenarios
Final Production Capstone	End-to-end Talend implementation, quality review, and delivery	Complete capstone submission with technical walkthrough review
Technical Mock Viva	Technical reasoning, troubleshooting approaches, and communication	Successfully defending project decisions in structured mock panels

RESUME, GITHUB & LINKEDIN

Evidence-based resume writing and professional project presentation.

- Modular GitHub repository per project with setup steps, dependencies, and clean commits.
- Detailed Data Integration diagrams, component specifications, and end-to-end workflows.
- Visual project sheets, live demonstration walkthroughs, and verified functional outputs.
- Project documentation covering Metadata setup, configuration steps, and test notes.
- Direct resume bullet points highlighting hands-on Talend tools and technical outcomes.
- Structured practice for technical interview pitches, walkthroughs, and viva defense.

OUR STUDENT

Meet the learners who turned their goals into successful careers through dedication, skill, and continuous growth.
