WHY LEARN WEB MOBILE ACCESSIBILITY TESTING ?

Enterprises worldwide are actively hiring certified Web Mobile Accessibility Testing professionals to drive critical business operations, digital transformation, and modernization.

CAREER SCOPE OF WEB MOBILE ACCESSIBILITY TESTING

Exponential Industry Demand
Rapid enterprise adoption across global IT firms, MNCs, and technology centers

Premium Salary Compensation
Command competitive compensation packages with rapid growth milestones

Cross-Industry Opportunities
Versatile skill set applicable across technology, consulting, finance, and core sectors

Future-Proof Career Growth
Long-term job security supported by ongoing digital modernization and tooling investment

Global Certification Pathways
Direct alignment with recognized industry certifications to validate your competence

Worldwide Job Prospects
Open doors to roles in major Indian tech hubs as well as international remote positions

INDUSTRY-RECOGNIZED CERTIFICATION

DETAILED MODULE PLAN

10 in-depth modules • 3 Months Duration • Hands-on practical training

1 Module 1: Accessibility Foundations

- Why accessibility matters legally, ethically, and operationally
- Disability models, inclusive design, and user impact awareness
- Accessibility as part of product quality rather than an afterthought
- Understanding barriers faced by different user groups

GUIDED LAB
Execute targeted test scenarios for Why accessibility matters legally and document verification results.

INTERVIEW & ASSESSMENT
Explain how Why accessibility matters legally ensures software releases are stable and defect-free.

2 Module 2: Standards and Guidelines

- WCAG principles: perceivable, operable, understandable, and robust
- Conformance levels and how teams interpret them in practice
- Difference between standards, best practices, and testing outcomes
- How guidelines shape real website and application work

GUIDED LAB
Execute targeted test scenarios for WCAG principles: perceivable and document verification results.

INTERVIEW & ASSESSMENT
Explain how WCAG principles: perceivable ensures software releases are stable and defect-free.

3 Module 3: Semantic HTML and

- Accessible Structure
- Headings, landmarks, forms, tables, links, and semantic markup
- Why proper HTML structure improves accessibility and maintainability
- Accessible labels, instructions, and
- relationships in UI elements
- How structure supports screen readers and keyboard users

GUIDED LAB
Execute targeted test scenarios for Accessible Structure and document verification results.

INTERVIEW & ASSESSMENT
Explain how Accessible Structure ensures software releases are stable and defect-free.

4 Module 5: Color, Contrast, and Visual Accessibility

- Color contrast requirements and
- non-color-based communication
- Accessible typography, spacing, and visual readability basics
- Design decisions that create or remove user barriers
- Supporting low-vision and cognitive
- accessibility needs

GUIDED LAB
Execute targeted test scenarios for Color contrast requirements and and document verification results.

INTERVIEW & ASSESSMENT
Explain how Color contrast requirements and ensures software releases are stable and defect-free.

5 Module 4: Keyboard and Focus

- Accessibility
- Keyboard navigation, focus order, visible focus, and interaction patterns
- Managing modal dialogs, menus, and interactive components accessibly
- Avoiding keyboard traps and broken
- interaction flows
- Testing for practical keyboard usability

GUIDED LAB
Execute targeted test scenarios for Accessibility and document verification results.

INTERVIEW & ASSESSMENT
Explain how Accessibility ensures software releases are stable and defect-free.

6 Module 6: Forms, Media, and Dynamic Content

- Accessible forms, error messages, helper text, and validation patterns
- Captions, transcripts, and multimedia accessibility awareness
- ARIA basics and when not to overuse it
- Handling dynamic interfaces without harming accessibility

GUIDED LAB
Execute targeted test scenarios for Accessible forms and document verification results.

INTERVIEW & ASSESSMENT
Explain how Accessible forms ensures software releases are stable and defect-free.

7 Module 7: Screen Reader and

- Assistive Technology Awareness
- How screen readers interpret page structure and content
- Testing mindset using assistive technology scenarios
- Understanding common user experience issues during navigation
- Building empathy-driven debugging and remediation habits

GUIDED LAB
Execute targeted test scenarios for Assistive Technology Awareness and document verification results.

INTERVIEW & ASSESSMENT
Explain how Assistive Technology Awareness ensures software releases are stable and defect-free.

8 Module 8: Accessibility Testing and Auditing

- Manual testing, automated tools, and audit workflows
- Finding issues, documenting impact, and prioritizing fixes
- Using browser tools and accessibility checkers effectively
- Balancing tool output with real usability understanding

GUIDED LAB
Write clear step-by-step test cases for a login page and log defects in a bug tracker.

INTERVIEW & ASSESSMENT
Explain what makes a great bug report and how to prioritize defects.

9 Module 9: Remediation and Team Collaboration

- Working with designers, developers, QA, and content teams on fixes
- Writing clear accessibility bug reports and implementation guidance
- Accessibility in design systems, websites, and ongoing product work
- Interview-focused explanation of auditing and remediation experience
- Certifications (2026 Updated)

GUIDED LAB
Write clear step-by-step test cases for a login page and log defects in a bug tracker.

INTERVIEW & ASSESSMENT
Explain what makes a great bug report and how to prioritize defects.

10 Module 10: Real Project Workflow

- Auditing a real webpage or small site for accessibility issues
- Applying standards, testing, reporting, and remediation recommendations together
- Creating a structured accessibility review report
- Project output aligned with QA, frontend, and accessibility-focused roles
- CPACC - Certified Professional in Accessibility Core Competencies Validated by: IAAP
- Fees: Standard fee USD 510
- Exam duration: Track current IAAP exam format and appointment details Mode: Exam delivery through IAAP's certification process
- Validity: Per IAAP certification maintenance requirements

GUIDED LAB
Complete an end-to-end practical project bringing together everything you built in this course.

INTERVIEW & ASSESSMENT
Present your completed project and explain your key design decisions with confidence.

REAL-WORLD PORTFOLIO PROJECTS

Practical industry scenarios, tools applied, and demonstrable project outcomes.

Project 1: Accessibility Setup & Architecture

What it is: Set up the core Accessibility environment and configure essential business settings.
What you do: Initialize base configurations, create clean templates, and verify workflow controls.
Tools used: Accessibility Testing, accessibility matters legally
Project outcome: Working project foundation configured and tested according to best practices.

Project 2: Semantic HTML Feature Implementation

What it is: Build practical Semantic HTML modules to handle everyday business operations.
What you do: Create core functional components, validate input data, and prevent common errors.
Tools used: Accessibility Testing, Semantic HTML, Accessible Structure
Project outcome: Functional business module ready to run and demo with zero manual errors.

Project 3: Keyboard Focus Data & Logic Pipeline

What it is: Connect Keyboard Focus with Accessibility to automate data and team workflows.
What you do: Set up automated pipelines, link required services, and run end-to-end tests.
Tools used: Accessibility Testing, Keyboard Focus, Accessibility
Project outcome: Live automated workflow pipeline documented with clear usage guides.

Project 4: Screen Reader Integration & Automation

What it is: Optimize Screen Reader workflows for security, speed, and reliability.
What you do: Audit performance bottlenecks, apply security rules, and optimize execution speed.
Tools used: Accessibility Testing, Screen Reader, Assistive Technology
Project outcome: Production-grade technical deliverable ready to add to your personal portfolio.

Project 5: Accessibility Testing End-to-End Capstone

What it is: Build a complete, production-ready Accessibility Testing project bringing all skills together.
What you do: Design, code, test, and document a full project workflow from scratch to launch.
Tools used: Accessibility Testing, Remediation Team Collaboration
Project outcome: Verified capstone project ready to showcase on your resume and interview calls.
